PROFESSIONAL SUMMARY

Recent Computer Science graduate (GPA 3.48/4.0) with hands-on full-stack development experience across React.js, Node.js, MySQL, and Python/Flask. Built and deployed multiple live client websites, including bilingual (English/Arabic) platforms with integrated email-based quote requests, and a machine learning-integrated capstone platform. Web Development Intern experience with agile teams. Dean's Honor List recipient. Seeking a full-stack or web developer role to apply strong front-end and back-end development skills.

TECHNICAL SKILLS

Programming Languages: Python, Java, C#, JavaScript, PHP, SQL, Assembly (basic)

Frameworks & Libraries: React.js, Node.js, Express.js, Laravel, Flutter, Flask, Tailwind CSS

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Visual Studio, Visual Studio Code, Postman, EmailJS

PROFESSIONAL EXPERIENCE

Web Development Intern | RAION Digital

Aug 2025 – Sep 2025

- Assisted in developing responsive web applications using React.js, Node.js, Laravel, MongoDB, HTML, CSS, and JavaScript, contributing to e-commerce and informative websites.
- Collaborated with cross-functional teams following structured development workflows and meeting project deadlines.
- Gained practical experience with industry-standard web development practices and version control.

Freelance Full-Stack Developer | Self-Employed

Dec 2025 – Present

- Independently designed and developed full-stack websites for clients, including Hasbani (Nature's Taste), a Lebanese food brand, and Cedar Stone (cedarstonelb.com), a bilingual business website.
- Built an admin dashboard for Hasbani enabling full control (add, edit, delete) over product listings, categories, descriptions, and images, without requiring end-user login.
- Implemented a live English/Arabic language toggle, a "Request a Quote" form integrated with EmailJS, and custom CSS/JS animations on Cedar Stone; used React.js, Node.js, MySQL, and Tailwind CSS across both projects' full development lifecycle.

KEY PROJECTS

LebanonGen — Machine Learning-Powered Genetic Health Platform (Senior Capstone Project)

- Developed a full-stack platform enabling couples to input genetic information and receive machine learning-based predictions of sickle cell anemia risk in potential offspring, with a real-time Groq API chatbot for user guidance.
- Designed an interactive map visualizing sickle cell anemia prevalence across Lebanon from aggregated, anonymized user data, and a multi-tier admin system for Administrator, Researcher, and Doctor roles.
- Technologies: React.js, Node.js, MySQL, Tailwind CSS, Python, Flask, Groq API.

EDUCATION

Bachelor of Science in Computer Science

July 2026

Lebanese International University – Nabatieh Campus

GPA: 3.48/4.0

Dean's Honor List: Spring 2023/2024, Fall 2025/2026

CERTIFICATIONS

- CCNA Network Certification — Apr 2025
- Building RESTful APIs in Laravel, LinkedIn Learning — Aug 2025
- Artificial Intelligence Foundations: Thinking Machines, LinkedIn Learning — Jun 2025

ACTIVITIES & LEADERSHIP

- Research Contributor, FIKRA Project — Computer Science research team
- Member, Computer Science Club, Lebanese International University

LANGUAGES

Arabic (Native) | English | French (A1)
